Dear Friends and Colleagues
It is a great pleasure to welcome you to Istanbul for the European Meeting on Laparoscopic and Robotic Urologic Surgery. "Challenges in Laparoscopy and Robotics" has reached the 12th edition and the concept that initiated this adventure is quite alive and shows great potential for the future of Urology.
The comprehensive scientific program will include live laparoscopic and robotic surgeries performed by the world's most prominent urologic surgeons. In the past meetings, we have witnessed many challenging procedures. It is now time to expand our indications and to look forward to new challenges like the Trans-Douglas RARP, the Clampless Partial Nephrectomy, the Robotic Orthotopic New Bladder, the Cava Thrombus in RCC, the retroperitoneal Robotic Partial Nephrectomy, the Retroperitoneal Lymphadenectomy and the HD-3D STORZ System. We are enthusiastically anticipating an extremely stimulating meeting. Live surgery, State of the art lectures, discussions and thought-provoking debates will take place with the participation of the best urologists in the International arena. There will be three monitors transmitting three different surgeries at the same time. Each delegate will be provided with headphones with the possibility to select the preferred moderation. All questions will be transmitted to the moderators via Twitter. We are very proud to host this 12th International Meeting in Istanbul, the only city in the world placed in two continents and divided by the sea!! The perfect city for old antiquities and innovative techniques to convene. All the surgeries will be transmitted live from the Memorial Hospital one of Turkey leading centers in Urology. We hope that the challenging procedures that you will see will lead the way towards defining the future of Urologic Surgery.
