| 21:20-21:30 | Summary<br>Dr. Jean de la Rosette                   |

### Mr. Christof Kastner Biography

Mr Christof Kastner is an internationally-recognised consultant urologist based at the Nuffield Health Hospital, the GenesisCare Centre and Addenbrooke's Hospital in Cambridge and at the Nuffield Health at St Bartholomew's Hospital in London. He specialises in the assessment and treatment of benign and cancerous prostatic disease. He is one of the pioneers of MRI Fusion technology in the UK, having introduced the technology alongside his partners in radiology, led by Prof Tristan Barrett.

With his clinical and technical expertise, Mr Kastner has driven the development of MRI Fusion Vector prostate biopsies, which has minimal side effects and is easily sustained under local anaesthesia.

Besides his highly-sought urologist practice, Prof Kastner is a senior author of numerous publications, which have changed the approach to prostate cancer assessment worldwide and have been marked as leading, high-quality urology findings, top in their field of expertise. His collaboration with his radiology partners also included a post as Professor of Urology in Rome between 2016 and 2021, where Mr Kastner delivered medical lectures, supervised trainees and developed clinical pathways for urology.
